### SEARS AUTO CENTER

Smith Haven, New York

#### **BENEFIT:**

50% Energy Savings

When a Sears Auto Center chose to drive up profits with an energy-efficient lighting system, they turned to Westinghouse Lighting Solutions to customize a solution. Sears Auto Center saw its lighting energy usage drop by half after Westinghouse replaced the 250 watt metal halides with 2-lamp 117 watt T5 fixtures. According to Store Manager Ken Clifford, what really drove home the point was a 300% increase in light levels. "My guys love these lights. They said they can finally see what they're working on," said Clifford.
