

WESTINGHOUSE  
LIGHTING  
SOLUTIONS

Before

Fixtures mounted at 33' height on 25' centers. 300' typical rows utilized 12 Hybrid 4 lamp medium beam fixtures to achieve 18.55 footcandles with input watts of 2808 (before sensors). LPD: .36

Annual Environmental Impact  
Reduction in Carbon Dioxide: 880.12 metric tons  
Reduction in Sulfur Dioxide: 9,914,052 grams  
Reduction in Nitrogen Oxide: 4,425,916 grams

## DISTRIBUTION

**NINE WEST /  
Jones Apparel Group Inc.**  
West Deptford Township, NJ

### COST SAVINGS:

- Demand Reduction **265 kw**
- Annual Operational Savings **\$180,443**

### BENEFITS:

Project goals of increasing uniformity and quality of lighting throughout the 500,000 square foot facility, reduce energy usage and maintain system reliability, were met. Facility operates 24 hours a day, 5 days a week. Total Payback period is 1.3 years. Employees report that space is more evenly lit with less glare.
